About Me

My name is Rungthip Suksrisawad, a 21-year-old senior majoring in Agricultural Intelligence Engineering at King Mongkut's Institute of Technology Ladkrabang. With a strong foundation in agricultural data analysis and innovative engineering solutions, I have developed the ability to integrate technology with sustainable farming practices. My studies and research in precision agriculture and hydroponics have equipped me with practical skills to develop smart farming solutions for a more sustainable future.

Experience

Tractor Operation Training

Participated in a training course on using tractors to learn about various safety issues, hand signals about tractors with Company CNH.

Agricultural Drone Pilot Training

Participated in agricultural drone flight training to learn about safety and laws regarding drones with Company HiveGround.

Internship Program at BANGSAI AGRICULTURAL CENTER CO.,LTD

Worked on a project to work on a project that involved comparing the growth of habanero peppers in a drip hydroponic system. Tidal and aeroponics to be able to choose the method for growing habanero peppers that are most appropriate and of the highest quality.

Education

The faculty of Engineering King Monkut's Institute of Technology Ladkrabang , 2021-present

Bachelor's Degree in Artificial Intelligence Engineering (GPAX 3.19)

Soft skills

- adaptability
- Communication
- Emotional Intelligence

Hardskills

- Microsoft Word
- Python (Basic)
- SolidWorks (Basic)

Language

- CEFR B1
